RE: Garage Roof and Interior Repair Program
Garage Roof Work Starting

After some delays in getting the DOB permitting to continue work on the garage, work will be starting June 26th. There will be core drilling and probes done to the garage roof by Xinos Construction and they will be starting to mobilize materials and equipment into the garage.

The garage roof will be closed for general access. There will still be passage from the basement of Bogardus to the trash area and to the side gate and ramp. There will not be access to the garage roof from the lower courtyard or from Nagle Avenue. There will be an updated schedule as the repair project progresses.

Thank you for your attention to this matter.
